Introduction

SOHAR Port is a deep-sea port centrally located and in close proximity of the main shipping routes connecting the Gulf and the Indian subcontinent with the rest of the world. Thereby, it is an ideal location for a stop-over to obtain all required services for your vessel sailing in the region. On a yearly base, SOHAR Port receives more than 3000 vessel calls.

Key Highlights

- Located at the heart of major shipping routes into the Gulf and India.
- Year-round favorable anchorage conditions for your vessel.
- Comprehensive one-stop services.
- A 2-3 hour drive from major hubs like Dubai and Muscat.

Bunkering and Marpol Waste Collection

At SOHAR Port, we provide reliable bunkering services through our active suppliers, ensuring your vessels receive the necessary marine fuels efficiently. Our state-of-the-art shore-based MARPOL waste treatment facility adheres to the highest international standards, offering comprehensive waste collection and processing at the anchorage.

Anchorage Areas

SOHAR Port offers anchorage areas with depths ranging from 30 to 60 meters, located 4-10 nautical miles offshore, accommodating vessels of all sizes. With year-round favorable sea and meteorological conditions, our anchorage is ideal for services requiring mild sea states, such as minor repairs, hull cleaning, ship-to-ship transfers (STS), floating storage, and lay-up.

Layby Services

SOHAR Port provides layby options at berth 25 for ships ranging from 160 to 220 meters LOA. This jetty deck, accessible by trucks, mobile cranes, and cherry pickers, is perfect for minor repairs, hold cleaning, and other maintenance activities. Please note that prior approval is required for hot works from the port authorities.

Mass Flow Meters (MFM) for Bunker Fuel Supplies

In February 2024, SOHAR Port and Freezone announced a mandate on the alignment of ISO 22192 standards 'Bunkering of marine fuel using the Coriolis MFM system' for all marine fuel supply operations within the port, effective from January 1, 2025. This aligns with global best practices observed in ports like Singapore and Rotterdam.

Crew Change and Logistics

With Muscat and Dubai as main hubs within 2-3 hours driving distance, any crew change or deliveries can be executed efficiently. Sohar Airport also offers flights to some of the main airports in the region.

New Duty-Free Shop and Seafarers Club

A brand new duty-free shop and seafarers club are available onshore for your crews to enjoy time ashore and purchase necessary items.
